

HomeSmart Solar – Thermal Residential, Direct or Photovoltaic Powered Venting to any Heated Space. The space may be a home, garage, workspace or ??

Direct Venting into a Room - SolarSheat 1500G

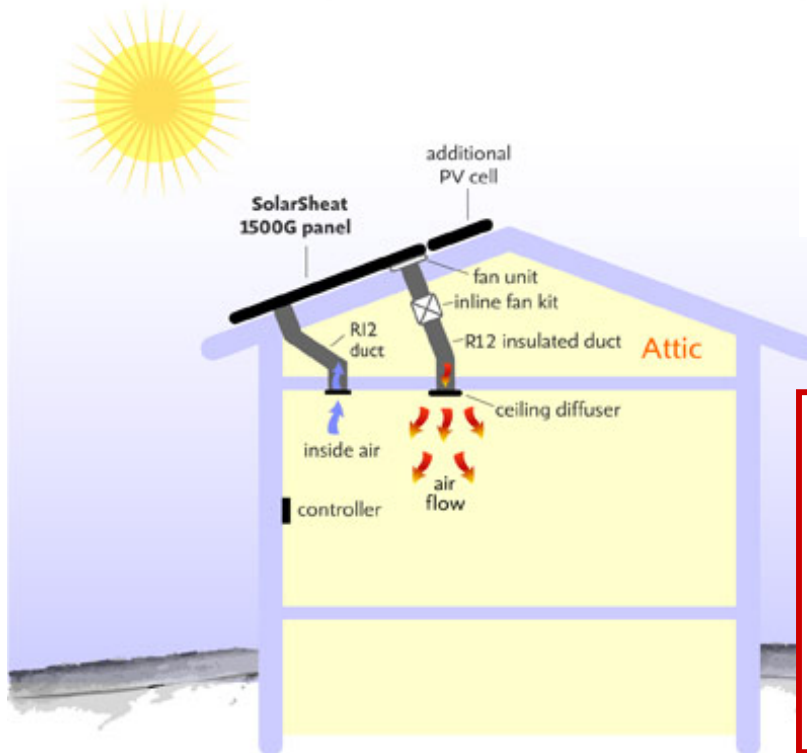

How it works: The SolarSheat 1500G panel heats inside air. The amount of heat produced is based on the volume of air passing through the solar panels and the degree of sunshine. The SolarSheat is a supplemental heating system. It does not work at night. No AC electricity is required.

Convection (hot air) moves into the heated space. No power needed.

Roof Mounting - SolarSheat 1500G

How it works: The SolarSheat 1500G panel heats inside air. The amount of heat produced is based on the volume of air passing through the solar panels and the degree of sunshine. The inline fan kit can be powered by an AC/DC wall adaptor or with an additional PV cell, to keep it off the grid.

Powered by Photovoltaic cell on roof. No line power source needed.
